Mike Lowe has over 25 years experience as a farm management consultant. He specialises in providing financial and technical support to dairy farmers and rural businesses, including rent tenders, compensation claim evidence, expert witness evidence and appraisals for banks. Formulating objectives, working out business policy and how to best implement it for farming clients is a major part of his work.

In recent years, much of this work has been funded under various Business Link schemes such as FBAS, RBSP and RBSI which has considerably reduced the cost to clients. Technical advice such as rationing for higher yields can sometimes be grant funded in Cornwall.

He has considerable experience in accessing grant funding for planning, appraisals and diversification projects in Cornwall.

Increasingly Mike is involved with the new environmental schemes under the Single Farm Payment, particularly the Entry Level Scheme.

For many years he has been involved in farm building design from site survey to detailed design stage, particularly for expanding dairy units.

Mike also provides Agricultural Dwelling House Appraisals for farmers.

Since taking on an assistant, he offers full farm costings and VAT accounting to clients.
